

Anandharaj A

Full Stack Software Developer |  aaraj232@gmail.com |  +91 8925191383

 Kovilpatti, Tamil Nadu, India |  [LinkedIn](#) |  [GitHub](#) |  [Portfolio](#)

Professional Summary

Highly skilled **Full Stack Software Developer** with strong expertise in building scalable, high-performance **web, mobile, and data-intensive platforms**. Proficient in **FastAPI, Node.js, React.js, Next.js, Flutter, Kafka, Redis, WebSockets**, and **microservices architecture**. Experienced in **observability, OpenTelemetry, AI/ML pipelines, RAG systems**, and **big data technologies** such as **Apache Iceberg, Spark, Trino**, and **Hive**.

Strong ability to design clean architectures, optimize system performance, and deliver secure, production-ready applications for complex enterprise use cases.

Skills

Programming Languages: JavaScript, TypeScript, Python, Dart

Frontend: React.js, Next.js, Redux, Zustand, Tailwind CSS, MUI, Google Maps, Ola Maps

Backend: FastAPI, Node.js, NestJS, Express.js, REST APIs, Redis, Kafka, WebSocket

Python Stack: FastAPI, PyTest, PySpark, NumPy, Tensorflow, PyTorch, OpenCV, PyTino, Pylceberg, PyJWT, Pandas

Databases: PostgreSQL, SQL, MongoDB, Trino, Apache Iceberg

Mobile Development: Flutter, React Native, Expo, Android, iOS

DevOps & Cloud: Docker, Kubernetes, OpenShift, Helm, Argo CD, GitHub Actions, MinIO, AWS, Linux, DNS, CI/CD

Big Data: Apache Spark, Iceberg, Hive, Kafka, Superset, Snowflake

Observability: OpenTelemetry (OTel), Prometheus, Grafana, Jaeger

AI/ML & RAG: YOLO, Isolation Forest, Hugging Face, GPT-2, LangChain, LangGraph, Milvus

Other: Microservices, Data Mesh, RBAC, Real-time Systems

Education

Bachelor of Engineering (B.E) – Computer Science and Engineering
Government College of Engineering, Tirunelveli | **2019 – 2023** | **CGPA: 70%**

Work Experience

Full Stack Software Developer

Zaga Open Source Pvt Ltd | Jun 2024 – Present | Kovilpatti, India

- Designed and implemented **Data Mesh Architecture** using OTel, Kafka, Iceberg, Hive, MinIO, Trino, and Redis.
- Built a **real-time observability platform** integrating logs, traces, and metrics.
- Developed scalable **FastAPI microservices** with CI/CD automation.
- Built **React dashboards** for infrastructure monitoring and analytics.
- Implemented **RBAC** using Trino access controls for secure data governance.
- Led deployments using **Kubernetes, Docker, Helm, AWS, and OpenShift**.
- Optimized **MinIO storage** for large-scale telemetry workloads.
- Built **real-time analytics pipelines** using Kafka + Trino.
- Developed **ML anomaly detection models** using Isolation Forest.
- Built intelligent **AI Agents** using LangChain, RAG pipelines, and custom tools.

Software Development Engineer

Icanio Technologies | Sep 2023 – Feb 2024 | Tirunelveli, India

- Built responsive **React.js UI components** and integrated REST APIs.
 - Developed backend services using **Node.js, SQL, and MongoDB**.
 - Implemented **authentication workflows** and optimized DB operations.
 - Collaborated with Agile teams, performed **code reviews**, and cross-team development.
-

Projects

AI/ML Management Dashboard – Multi-Model Training & Orchestration

- Developed a centralized **AI/ML model management dashboard** supporting multiple independently deployed ML models.
- Built a unified **FastAPI-based AI/ML Management API** for training orchestration, payload processing, and result generation.

- Implemented project CRUD, training CRUD, model status tracking, and automation workflows.
- Enabled UI-based **training triggers**, job monitoring, and training lifecycle management.
- Integrated logs, metadata, and execution history for streamlined **MLOps**.
- **Technologies:** FastAPI, Python, React/Next.js, Docker, PostgreSQL, AI/ML APIs

Data Lake Management & Data Product Platform

- Built a backend-driven platform for **data product creation and governance** on top of a data lake.
- Integrated **Apache Iceberg REST backend** for catalog, schema, and table management.
- Used **MinIO** for scalable, versioned data storage.
- Leveraged **Trino** for query execution, enabling visual query building without SQL.
- Enabled teams to publish saved queries as **REST APIs**.
- **Technologies:** Python, FastAPI, React/Next.js, Docker, Iceberg, MinIO, Trino, PostgreSQL

Observability & Monitoring Platform

- Developed a unified **observability platform** for real-time insights.
- Built pipelines using **OTel, Kafka, Spark, Iceberg (MinIO/S3), Trino**.
- Implemented **LLM-based anomaly detection** with Milvus.
- Designed dashboards for sustainability, resource analysis, and case automation.
- **Technologies:** Python, FastAPI, React/Next.js, Spark, Iceberg, Kafka, Trino, MinIO, OTel, Milvus, Docker

Online Meat Delivery App

- Built microservices using **FastAPI** and **PostgreSQL**.
- Created Flutter app for customers with **real-time order tracking**.
- Built React admin dashboard for product, delivery, and order management.
- Integrated **Razorpay payments**, Redis caching, and WebSocket updates.
- **Technologies:** FastAPI, Flutter, React.js, PostgreSQL, Redis, WebSocket, Razorpay, Docker, GitHub Actions

Perfido – SaaS Performance Testing Platform

- Full-stack SaaS platform using **Next.js** and **Node.js**.
- Designed workflows for performance test execution and real-time monitoring.
- Implemented **SSR/SSG**, caching, and optimized performance.
- Deployed using Docker with **CI/CD pipelines** and AWS.
- **Technologies:** Next.js, Node.js, Express.js, PostgreSQL, Docker, AWS, CI/CD
